## Pre-Recorded Content for Panels – Individually (or Collectively)

---

The paper presenters of your panel were invited to provide their pre-recorded presentations individually. But as you are receiving this guide you and your panelists expressed your preference to record the presentations together instead of individually. So alternatively, we are offer you the possibility to submit a panel recording with all paper presenters (and optionally with the chair) instead of individual recordings.

This panel video can optionally start with the chair introducing the speakers (max 5 mins), followed by each paper presenter's presentation (max 15 mins each). *The recording is not meant to replace the live session*, but should be seen as material that introduces the topic and the research of your presenters before the start of the live conference. Participants can watch the pre-recording and join the live discussion session that focusses on discussion and aims to maximize the opportunity to go more into depth. The live sessions during the conference dates will consist of **short recaps of 3-5 minutes of each presentation and will be followed by a longer lively discussion**, exchange, collaboration and Q&A led by your panel chair or your discussant if you had invited one. To enable free discussion these live panel sessions will not be recorded.

The deadline for the video upload is **1 August 2021**. Pre-recorded materials will be made available as of **10 August 2021** to give all participants the opportunity to browse and watch the different presentations before the start of the live conference between 24–28 August 2021 and will stay available until **15 October 2021**.

### Video requirements:

- Video length: **chair: 5 minutes max** plus **paper presenter: 15 minutes max** (per presenter)
- File size: **maximum of 2 GB** (please contact the ICAS 12 Organiser if your file exceeds this size)
- acceptable file type: **.mp4**

## Upload your Pre-recorded Video

---

For option 2 you can pre-record a presentation video with your own means and you can upload the video file to the CadmiumCD conference management system. *Video requirements* – video length: **max 15 mins**; file size: maximum of **2 GB** (please contact the ICAS 12 Organiser if your file exceeds this size); acceptable file type: **.mp4**

Some points of attention and recommendations to optimise your home recordings:

### 1. Camera Setup

We would recommend to use a built-in or an external webcam linked to your laptop or desktop; use landscape mode; pay attention to the distance from your body to your camera

### 2. Lighting

Consider recording your video in front of a window or another lightsource with light coming from the front.

### 3. Sound

We would recommend using an external USB-microphone; do not place it too close to your mouth (will cause clipping or pop sounds), but also not too far away (this will increase the chance of noise and echo); do a sound check before your start. Try to find a quiet time during the day for recording.

### 4. Presentation

Prepare for your recording, go over your presentation slides or text before you start recording. Practice a few times and start over if needed.

### 5. Room Set-Up

Be mindful of your room background, make sure the background is tidy and not distracting. Remember to protect your own privacy, make sure that things caught on camera are all right to be visible.

### 6. Representation

Prepare yourself like you would be doing the presentation in person, put on some nice clothes, brush your hair, etc. People will notice! Be mindful of your posture as well, try not to slouch for example.

To view these tips in more details, you can visit the website of [The Centre for Innovation, Leiden University](#) or download their [pdf with the tips](#) directly.
